DETAILED ACTION

- (1). Applicant's Amendments and Remarks filed on 01/31/2008 have been received.
Claims 13, 15-17, 19, 21, 23-28 are amended.
Total cancelled claims are 1-12, 14 and 22.
The rejections of claims 13-28 in prior Office Action dated 11/09/2007 is withdrawn according to the current Amendments.

Allowable Subject Matter

- (2). **Claims 13, 15-21 and 23-28** are allowed.

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter:

The instant application is in condition of allowance because the liquid membranes generated by a plurality of disc and a plurality of plates in a cylindrical arrangement, and to be collapsed when in contact with gaseous stream from gas convection means overcomes the teaching of related prior arts to be discussed hereinafter.

Applicant's invention is illustrated in the following:

The plurality of disc is in contact with the gaseous stream first, the liquid membranes of the cells are collapsed thereafter, the gaseous stream is contact with the liquid membrane of slot

Art Unit: 1797

of the plate, likewise, the liquid films of slot is collapsed. However, the direction of gaseous stream is turned at 90 degree to contact with both gas-liquid contact device – disc and plate, And to remove the contaminants in the gaseous stream.

Closest prior arts such as Ilg (US01846057), Schram (US01409593) teach the plate type gas-liquid contact screen as illustrated in the following:

AIR WASHER AND REMEDIATOR

Filed April 28, 1929

Bowman (US03350877) and Gale (US03353337) teach the disc type gas-liquid contact device to form liquid film in the openings of disc illustrated in the following:

However, if combining the two types of gas-liquid contact devices in cylindrical form, then one of the liquid films (disc holes or plate slots) will not collapse with the gaseous stream because the screen - plate type rotates in the same direction of the direction of gaseous flow, the disc type device rotates at 90 degree to the direction of gaseous stream. Whether gaseous stream comes in any one direction, one of the two liquid-contact devices will be parallel to the gaseous stream provided the inlet and outlet of gaseous stream not in the parallel direction in the chamber, none of the related prior arts cited above discloses such design to anticipate or render obvious to one of ordinary skills in the arts as to this day of Notice of Allowance. Claims 13, 15-21, 23-28 are considered to be patentable and passed to issue.

Art Unit: 1797

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
